

THE FORMATION AND DEVELOPMENT OF THE GCM ECOLOGICAL SYSTEM FROM 12/12/2019 TO 18/12/2019

Firstly TEAM DEV GCM would like to sincerely thank the members for supporting the project from the very first steps GCM is releasing Airdrop to everyone.

- The achievements in the first month achieved by the GCM system are listed:

+ In the beginning of December 2019: Team DEV GCM started a strategy to create a GCM ecosystem including professional Telegram system (Vietnam Coin Market System, Global Coin Market, GCM support channel, notification channel GCM, Bot Ex support channel and Ex Exchange) the number of coin market members increasing daily and still increasing over time is an important step to confirm the position of the market system on Telegram's system. Ecological. The coin market system has integrated wallets such as TRON, ONT, BNB, ETH, and ERC20 to enable members to trade at Telegram such as transfer, recharge, tip, airdrop, rain. Bot Ex Exchange is supporting members to buy and sell ETH, BTC, USDT, PM, PR 24/7 at a discounted price and receive money immediately when the transaction is successful. The GCM Admin team is friendly, enthusiastic and thoughtful member support.

+ GCM ecosystem includes:

- * Telegram market system, Airdrop GCM channel, Bot Ex Exchange.
- * Facebook, Messenger market system.
- * Zalo market system.
- * App GCM: App supports Airdrop, Bounty and IEO of market partners.
- * Ex Exchange trading Exchange.
- * Airdrop information web.

* Part of the partner: pay phone charges, pay electricity, pay in-game charges (LOL, Lien Quan ...) ... With extremely preferential prices.

- To make the process of exchanging items in the ecosystem more convenient, GCM was born. GCM is the cryptocurrency used in the GCM ecosystem. GCM is cryptocurrency ERC20. Because it runs on ETH's blockchain, it makes it easier for members to manage and buy gas costs.

- In just 3 days GCM has entered the Top 3 Vote of AtaiX Exchange, listed on the list of coins to be traded at Nanu Exchange, followed by listed at SouthXchange.

Currently GCM has been listed among the most profitable coins as long as you type "GCM Global Coin Market" then all information of GCM will be listed. Even the Telegram Global GCM group is listed on Google.

- GCM is listed at two information pages: Coingecko and Coinmarketdaddy awaiting censorship from the Admin site. Expect GCM to be listed shortly on the airwaves.

- Foreign newspapers have asked for GCM information to list on the newspaper such as buysellpro.com and coindar.org. The first post will be released when GCM issues an IEO on the trading Exchange on January 1, 2020 and GCM is allowed to officially trade on the trading Exchange on January 1, 2020.

- Currently, at Telegram of Vietnam coin market, there is Bounty distributing partner coin CALL and VERA. About CALL is the cryptocurrency used in the electronic newspaper alliance ecosystem and VERA is the token paid when you play a game that answers multiple-choice questions about life. You can contact Admin Global immediately at the market group. If you are concerned about these two tokens.

- Upcoming roadmap of GCM:

+ Conducting transaction at Nanu Exchange on 01/01/2020.

+ Selling IEO at 1 GCM = \$ 0.001 on 01/01/2020.

+ Airdrop trading coin convention has been issued since 01/01/2020.

+ Construction of E-commerce web GCM.

+ Building App GCM.

Implementation of the work ends at the end of Q2 - 2020.

+ Partner lists tokens in the ecosystem starting from February 1, 2020.

Implementing development of Ex Bot and Ex Exchange in Quarter 3 and Quarter 4, 2020.

Establishment of GAME GCM and developing related steps in Q1 - 2021.

- Above is the whole initial development of the GCM ecosystem in general and the GCM Coin in particular. We hope you will accompany GCM throughout the journey ahead.

Ho Chi Minh City, December 19, 2019
